

## One South West Supplier Engagement Event

Taunton Rugby Ground 3 & 10<sup>th</sup> May, 9:30am – 4:30pm

### Objectives:

- i. Supplier engagement:  
To share with the market One South West's vision and ambitions
- ii. To inform requirements:  
To help inform One South West's requirements for the LHCR data layer and associated acceleration of local sharing ambitions.
- iv. Determine ability of the market to meet requirements:  
To understand whether the suppliers can meet the minimum functional requirements of the LHCR programme and the specific ambition of the One South West LHCR, including timeframes and indicative costs.
- v. Determine capability to provide modular solutions:  
To understand the supplier's ability to provide modular solutions with the capability to support additional features and benefits aligned to the common challenges and requirements of the One South West STPs, either from within their own portfolio or in partnership with others, for example population health management tools, local IDCR or regional PHR capability.
- vi. Hear about existing cases of good practice:  
For the suppliers to outline how they have already delivered in other contracts, sharing lessons learned and how they will bring digital innovation and service transformation opportunities into One South West.
- vii. Determine appetite for working in partnership with other suppliers:  
To understand the suppliers' readiness and proven, demonstrable ability to partner with other suppliers to deliver innovation.
- viii. Inform implementation approach and level of resourcing required:  
To help inform One South West's approach to implementation and level of resourcing that STPs will need to commit for implementation, ongoing maintenance and service delivery of the LHCR minimum functional requirements and local IDCR delivery.  
To understand how the supplier would approach getting One South West up and running with the LHCR minimum functional requirements and showing an understanding of the varying levels of information sharing maturity across the footprint.

### Structure of the days

There will be 5 'Focus Groups' with a chairperson for each, along with a notetaker. Key questions will be used to ensure consistency and allow a fair comparison between the suppliers. The groups are;

- Professional Interest
- Transformation
- Technical
- Population Health Management / Data / Business Intelligence
- Implementation

Each supplier will visit each of the groups for 30 minutes.

Each day will start with two separate briefings between 9:00 and 9:15am;

1. Focus groups (terms of engagement, timings, role of the chairpersons and note takers)
2. Suppliers (how the days are structured)

Suppliers will be encouraged to bring along their key subcontractors to illustrate their ability to partner and bring innovation to their solutions.

Prior to these engagement days suppliers have been asked to provide a sort video clip show how their solution addresses a cancer care pathway, these will have been circulated to attendees via the Event Bright invitations.

Following the two days there will be a review meeting with the chairpersons and note takers from each group, this will be on the 15<sup>th</sup> May, Bristol. The output from this will be to inform the requirements for the One South West platform and local integrated digital records capability.
